

SAFETY DATA SHEET

Section 1: Identification

Product Name: 3245
Thermoplastic Polyurethane

CAS Number: Trade Secret

Product Use: Thermoplastic Adhesive

Manufacturer: Bemis Associates
One Bemis Way
Shirley, MA 01464

Telephone (General): 978-425-6761

Telephone (Emergency): CHEMTREC
1-800-424-9300

Section 2: Hazard Identification

United States (US)

According to OSHA 29 CFR 1910.1200 HCS this mixture is not classified as hazardous.

GHS Classification of the Substance or Mixture:

Health	Environmental	Physical
OSHA HCS 2012 – Classification criteria not met	OSHA HCS 2012 – Classification criteria not met	OSHA HCS 2012 – Classification criteria not met

Label Elements

OSHA HCS 2012 Does not require labeling

Hazard Statements – Hazards not otherwise classified

Precautionary Statements

Preparation Date: 7.10.2014
Revision Date: 7/11/2014

Format: GHS Language: English (US)
Page 1 of 9

Prevention	<ul style="list-style-type: none"> • Avoid breathing dust/fume/gas/mist/vapours spray • Wear protective gloves • Contaminated work clothing should not be allowed out of the workplace • In case of inadequate ventilation wear respiratory protection • Do not handle until all safety precautions have been read and understood
Response	<ul style="list-style-type: none"> • If exposed or concerned: Get medical advice/attention. • If on skin: wash with plenty of water. If irritation or rash occurs: Get medical advice/attention • If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do so. Continue rinsing. If eye irritation persists: Get medical attention • If inhaled: Remove person to fresh air and keep comfortable for breathing. If experiencing respiratory symptoms: Call 911 or emergency/doctor.
Disposal	<ul style="list-style-type: none"> • Dispose of contents/container in accordance with local regulations.

Section 3: Composition/ Information on Ingredients

Chemical Name	CAS Number	Percent
Thermoplastic Polyurethane	Trade Secret	100%

Hazardous Components

None by reference to OSHA 29 CFR 1910, Hazard Communication Standard.

See Section 8 for Exposure Limits

Section 4: First Aid Measures

Skin	Not likely to be hazardous by skin contact. Washing with soap and water after handling is advisable. If molten material gets on skin, cool rapidly with cold water. Do not attempt to peel the material from the skin and get medical attention
Eye	In case of contact flush eyes with plenty of lukewarm water for at least 15 minutes. Get medical attention
Ingestion	Not a probably route of exposure. Material unlikely to be hazardous by ingestion. If ingested call POISON CENTER if feel unwell. Seek medical attention if feel unwell

Inhalation	Not likely to be hazardous by inhalation. If exposed to fumes from overheating or combustion remove to fresh air and get medical attention if irritation develops.
-------------------	--

Section 5: Fire Fighting Measures

Suitable Extinguishing Media

Water, foam, dry powder and carbon dioxide

Firefighting Procedures

Firefighters should be equipped with NIOSH approved self-contained breathing apparatus with full face mask and full protective clothing to protect against potentially toxic and irritating fumes. Do not flush down sewers or other drainage systems

Unusual Fire/Explosion Hazards

Toxic and irritating gases/fumes may be given off during burning or thermal decomposition

Section 6: Accidental Release Measures

Personal Precautions

Wear appropriate personal protective equipment. Keep unnecessary people away. Isolate hazard area and deny entry. Stay upwind, keep out of low areas. Do not touch or walk through spilled material. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.

Emergency Procedures

As an immediate precautionary measure isolate spill or leak area for at least 50 meters (150 feet) in all directions. Eliminate all ignition sources. Keep out of low areas. Keep unauthorized personnel away. Stay upwind. Ventilate closed spaces before entering.

Containment/Clean Up Measures

Allow product to cool if hot or molten, sweep or scrape into secure containers for disposal. Do not flush to sewer or waterways. Prevent release to the environment if possible.

Section 7: Handling and Storage

Handling

Use appropriate personnel protective equipment. Practice good hygiene after handling. Have adequate ventilation. Do not get in eyes, on skin, or on clothing. Wash hands before eating, drinking, smoking. Remove contaminated clothing and clean before re-use.

Storage

Store in a cool dry place away from direct sunlight and sources of heat.
Protect from physical damage.

Section 8: Exposure Controls/Personal Protection**Exposure Limits**

None

Engineering Measures/Controls

Thermal processing operations should be ventilated to control fumes which might be given off during processing. Local ventilation is recommended to control emissions near the sources.

Personal Protective Equipment**Respiratory Protection**

None required in ventilated work areas. In case of insufficient ventilation around thermal processing operations wear NIOSH approved respiratory protection. A NIOSH approved respirator for organic vapors is generally acceptable for concentrations up to 10 times the PEL. For higher concentrations, unknown concentration, and oxygen deficient atmospheres use a NIOSH approved air-supplied respirator. Engineering controls are the preferred means for controlling chemical exposures. Respiratory protection may be needed for non-routine or emergency situations. Respiratory protection must be provided in accordance with OSHA 29 CFR 1910.134.

Eye Protection

Wear safety goggles or safety glasses with side shield during processing. Face shield can also be worn. Have eye wash stations available where eye contact can occur.

Skin Protection

Avoid skin contact. Wear gloves impervious to conditions of use. Gloves should be worn while handling. Additional protection may be necessary to prevent skin contact including use of apron, face shield, boots or full body protection. A safety shower should be located in the work area.

Section 9: Physical and Chemical Properties

Material Description	
Physical Form/Appearance	Solid
Odor	No Odour
Odor Threshold	
pH	Not established
Softening Point/Freezing Point	70°C- 90°C
Initial Boiling Point/Boiling Range	

Specific Gravity	Approximately 1.15
Flash Point	Not established
Evaporation Rate	
Flammability	
Upper Explosion Limit	Not established
Lower Explosion Limit	Not established
Vapor Pressure	Not applicable
Vapor Density	
Relative Density	
Solubility	Insoluble
Partition Coefficient	
Auto-ignition Temperature	
Decomposition Temperature	

Section 10: Stability and Reactivity

Chemical Stability Stable

Possibility of Hazardous Reactions

Hazardous polymerization will not occur

Conditions to Avoid Avoid prolonged exposure to elevated temperatures above 317°C

Incompatible Materials None

Hazardous Decomposition Products

The product is stable, under normal conditions of storage and use, hazardous reactions/decompositions should not be produced.

Section 11: Toxicological Information

Toxicological Effects	
GHS Properties	Classification
Acute Toxicity	OSHA HCS 2012 – Classification criteria not met
Aspiration Hazard	OSHA HCS 2012 – Classification criteria not met
Carcinogenicity	OSHA HCS 2012 – Classification criteria not met

Preparation Date: 7.10.2014

Revision Date: 7/11/2014

Respiratory sensitization	OSHA HCS 2012 – Classification criteria not met
Serious eye damage/irritation	OSHA HCS 2012 – Classification criteria not met
Skin corrosion/Irritation	OSHA HCS 2012 – Classification criteria not met
Skin sensitization	OSHA HCS 2012 – Classification criteria not met
TOST-RE	OSHA HCS 2012 – Classification criteria not met
TOST-SE	OSHA HCS 2012 – Classification criteria not met
Toxicity for Reproduction	OSHA HCS 2012 – Classification criteria not met

Target Organs No known significant effects or critical hazards

Routes of Exposure Skin, eye, ingestion, inhalation

Potential Health Effects

Inhalation

Acute No information available

Chronic No information available

Skin

Acute Non irritating. Molten polymer will adhere to skin causing deep thermal burns

Chronic No known significant effects or critical hazards

Eye

Acute May cause physical abrasion in contact with eyes. Molten polymer will cause serious burns to the eyes.

Chronic No known significant effects or critical hazards

Ingestion

Acute Not hazardous in normal industrial use

Chronic No known significant effects or critical hazards

Section 12: Ecological Information

Toxicity Material data lacking

Persistence and degradability

Preparation Date: 7.10.2014

Revision Date: 7/11/2014

Format: GHS Language: English (US)
